Education

University of Guelph

Bachelor of Computing in Computer Science, Honours Co-op

September 2022 – April 2027

Guelph, ON

Relevant Coursework

- Software Development Methodology
- Database Systems and Concepts
- Data Structures
- System Design and Analysis
- Data Science
- Analysis of Algorithms

Experience

theScore

May 2024 – December 2024 & May 2025 – August 2025

QA Automation Engineer - Vegas Team - Co-op

Toronto, ON

- Increased test coverage by automating and maintaining 75%+ of tests on the Vegas team (theScore Bet's back-end admin platform) using Selenium WebDrivers and Cucumber/Gherkin files with scenario steps implemented in Kotlin
- Created new API integration test coverage between Vegas back-end and theScore Bet's front end app via GraphQL requests/queries, ensuring rigorous end-to-end UI testing is maintained for key features and use cases and reducing automation runtime by 50%+
- Utilized Jenkins CI/CD to ensure streamlined automated tests were delivered each monthly Agile sprint and coordinated with the Vegas team to cover regression testing with a 95%+ pass rate for bi-weekly deployment releases using Testrail and Jenkins jobs scheduled nightly
- Collaborated with cross-functional teams during sprint planning, actively participating in daily Scrum calls and backlog refinement sessions, which improved test coverage by 200% for the Vegas automation framework

Hewlett Packard Enterprise

May 2023 – August 2023

Software Developer Intern

Mississauga, ON

- Developed and presented Chatr Bypass plans to customers through a team-integrated software development lifecycle, creating acceptance test plans documenting all customer uses cases
- Coordinated with Rogers customer as QA lead; completed 2 rounds/cycles of quality assurance
- Executed seagull scripts on Linux servers to simulate test cases with call tracking numbers, retrieving and processing call data records through the consolidation layer of HPE's interactive unified mediation (eIUM) to fetch billing details
- Maintained lower environment call transit number databases, configuring SQL tables for performance load testing, allowing for Chatr Bypass plan to have bandwidth for 50k+ transactions and 100 simulated calls per second

Projects

Maple Leafs Data Ingestion Pipeline | *Python, Flask, SQL*

Summer 2025

- Created a data ingestion pipeline that queries a sports API and processes the stats for the Maple Leafs into an SQLAlchemy database

JWT Spring Security Authentication Practice Project | *Java, JWT, Spring Boot, Supabase*

Summer 2025

- Created a Spring Boot application for user authentication with JWT-based security, including user signup, login, email verification, and basic error handling

Personal Website | *React, HTML/CSS/JavaScript, Vercel*

Summer 2024

- Implemented and used React framework to design a personal website to showcase projects and co-op experiences

8 Ball Pool Game | *C, Python, JavaScript, SQL*

Winter 2024

- Developed an 8 ball pool game, with a backend physics library in C, integrated a SQL database using Python, and designed a JavaScript-based front-end interface

Mancala Game | *Java, JUnit*

Fall 2023

- Created a 2 player Mancala game in Java utilizing JUnit for unit testing and test-driven development

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, SQL, GraphQL, Elixir

Developer Tools: VS Code, IntelliJ, Git, Jira, Docker, AWS S3

Technologies/Frameworks/Other Skills: JUnit/Cucumber/Gherkin, Jenkins CI, React, Selenium, TestRail, Gradle, Spring Boot, Flask, Quality Assurance, Test Planning Documentation
